**In your words, describe the equipment, commodity, or contractual service. Explain how these specifications are essential to the accomplishment of your work:**

Video Software Installation, subscription, and support service for Football Video File Exchange. The package includes streaming, license, game exchange, support, storage and distribution, subscriptions, and a new storage server. This is essential for our football staff to breakdown, edit, and analyze video for football during their practice and games. Filming, analyzing, and storing video is essential for top performance and helps the student-athletes and staff dissect plays and movements better for enhanced play.

**In your own words, describe the reason(s) the item is not subject to competition from other sources and how the stated specification(s) restrict the requisition to only one supplier. Description may include unique features/compatibility/specifications/availability/delivery time frame etc. (Note: Price is not a valid reason).**

USF Football, as well as other sports, also use Catapult Vests which are sole sourced due to Catapult being the only provider of Inertial Movement Analysis. The video software package is also capable of providing this, which will help coaches and staff measure these movements to help identify weaknesses, strengths, and prevent injury, while also identifying, analyzing, and storing video for elite performance of the student-athletes.

**In your own words, describe the due diligence conducted to validate this supplier as Single Source. Description SHOULD list all other suppliers with item(s)/service(s) with similar functions, your efforts to identify other suppliers, and why these suppliers would not qualify to submit a competitive quote.**

USF Athletics has been using Catapult products and services for years due to their high quality performance and satisfaction. The current contract for this product and service is set to expire on June 30th, 2024. Because they are the sole source of Inertial Movement Analysis, Catapult is not subject to competition from other suppliers. This specific video exchange software and storage is necessary for function to align with the use of the catapult vests.
