

Wraparound Interventions & The System of Care

Course Description

This course is designed to explore the concepts underlying the “Wraparound” philosophy in providing care to children, youth, and families with complex needs. The information presented demonstrates how these service delivery values and associated practices have become an integral part of providing effective and efficient interventions within child and family serving systems.

Students will be given an overview of the Wraparound care coordination process as a vital part of system of care practice and offers a basic understanding of how this approach is conceptualized, practiced, supported, and studied. In addition students will learn that Wraparound is as much a system-level intervention as a practice-level intervention, and the interdisciplinary and community-based structures necessary to ensure that the Wraparound practice model can be used to provide services needed by children and adolescents with the most complex needs and their families in a system of care.

Who Should Take this Course

Graduate-level students seeking a 3-credit elective course and interested in:

- Working in Private Practice
- Serving as Administrators in Healthcare or School Systems
- Providing Services, Interventions, Evaluations, and/or Assessments that are Billable to Managed Care Companies
- Generating Funding to fulfill the Mission of Nonprofit Organizations Creating Sustainable Behavioral Health Programming for Children, Adolescents, and Adults
- Social Workers
- Case Managers

About the Instructor

As a Doctor of Public Health and a licensed mental health professional, adviser, coach, advocate, and change-maker in the nonprofit world, Dr. Radlauer-Doerfler is transforming individuals, organizations, and communities, and advancing mental wellness through innovation. She has spent over 25 years working in human services and organizational development and has had a hand in hundreds of projects involving training, coaching, system planning, leadership development, and more in the mental health field. She is an expert in the Wraparound process and has been researching, writing, training, coaching, or facilitating the process for over 25 years.
