Artificial Intelligence in Literacy Learning
Overcoming Myths and Unlocking New Possibilities

Thursday, February 27, 2025
6:00 p.m. - 7:30 p.m. EST
Online
Join us for this free webinar!

Offered in partnership with the USF Literacy Studies program in the College of Education as part of an ongoing webinar series.

Designed for literacy educators and leaders, this webinar will explore the potential of AI in literacy education. We will challenge common misconceptions about AI, providing clarity on its role in the classroom and dispelling fears around its use. You'll gain a better understanding of how AI can be harnessed to support personalized learning, encourage creativity, and deepen student engagement in literacy practices.

The session will also include a hands-on opportunity to develop and create AI-infused activities that enhance literacy instruction while ensuring students are using AI in meaningful ways—without shortcuts.

A 15-30 minute Q&A session will follow the presentation, giving you a chance to ask questions, share ideas, and receive additional guidance on applying AI effectively in your own teaching practice.
