Bridging the AI Literacy Gap for Equitable Teacher Education

> **REGISTER NOW**

🏷️ Free to attend

Join us for this research talk to learn more about the AI-Eq project, which aims to establish a comprehensive pathway to enhance educators' AI literacy competencies. The AI-Eq project will provide insights into educators' current AI literacy levels, analyze key factors influencing these competencies, and highlight effective strategies for initiating professional development. This presentation will offer actionable recommendations for fostering AI literacy among educators.
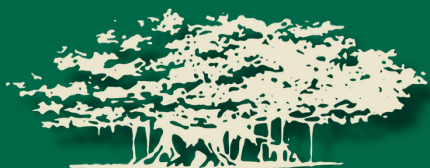

🕐 **12:00 p.m. - 1:00 p.m.**
Lunch is provided.

📅 **Friday February 7, 2025**

📍 **TECO Hall**
USF College of Education
Tampa campus

Dr. Bo Pei is a passionate educator with a focus on the intersections of technology, data, and pedagogy. He offers a diverse portfolio of courses, including Data Visualization in Education and Introduction to Big Data and Learning Analytics. Driven by a vision of interdisciplinary collaboration, he aspires to democratize computational and data analysis skills, especially for those in the social sciences. Through his innovative teaching methods and curriculum design, Dr. Pei ensures that students not only acquire technical prowess but also appreciate the broader implications and applications of their knowledge in real-world contexts.
