

Brad E. Rosenheim

College of Marine Science
University of South Florida
140 7th Avenue South
Saint Petersburg, Florida 33701

Tel. 727-553-3354
email: brosenheim@usf.edu

Educational and Professional Information

Education

- 2005 Ph.D., University of Miami, Rosenstiel School for Marine and Atmospheric Science
1999 B.S. (*magna cum laude*), University of Vermont, Environmental Science major, Geology concentration

Professional Experience

- 2016-present Associate Professor, College of Marine Science, University of South Florida
2013-2016 Assistant Professor, College of Marine Science, University of South Florida
2008-2013 Assistant Professor, Department of Earth and Environmental Sciences, Tulane University
2005-2007 Postdoctoral Investigator, Woods Hole Oceanographic Institution

Honors and Awards

- 2010 Weiss Presidential Teaching Fellow Finalist, Tulane University
2000 Outstanding Student of the Year, Marine Geology and Geophysics, University of Miami
1999 Magna cum laude distinction, University of Vermont
1999 Induction into Alpha Chapter of Vermont, Phi Beta Kappa
1999 Charles Doll Award, Top Geology Department student, University of Vermont
1997-1999 John Dewey Scholar, University of Vermont
1995-1999 Beard Family Scholarship, College of Arts and Sciences, University of Vermont

Professional Society Memberships

American Geophysical Union, American Chemical Society, Geological Society of America, European Geosciences Union, American Society of Limnologists and Oceanographers, La Société Française des Isotopes Stables, Phi Beta Kappa

Extramural Funding

Total Research Funding to Date: \$5.75 million

Current or Recommended-for-Funding Grants

- Florida Recovery Act Centers of Excellence Program “Evaluation of past Florida Gulf Coast mangrove restorations as a basis for future restoration success and resiliency.” April 7, 2023 (awarded December, 2022, \$915,090). Lead PI: **Brad Rosenheim**
- NSF Chemical Oceanography “Collaborative Research: What Happens to Terrestrial Organic Matter in the Ocean? Solving the Mystery Behind an Iconic Question.” September 1, 2019-August 31, 2022. (Funded, September 1, 2019, \$357,690). Lead PI: **Brad Rosenheim** University of South Florida
- NSF Polar Programs “Collaborative Research: Time Matters – A comparison of diatom ¹⁴C and Thermochemical ¹⁴C dating methods in sediment records of ice retreat from the East and West Antarctic Margins.” March 15, 2017 – present. (PLR-1644117 \$488,390). Lead PI: **Brad Rosenheim**, University of South Florida

Completed Grants

- NIFA/USDA (via NASA ROSES) “Organic carbon biomass, burial, and biogeochemistry in blue carbon ecosystems along the South Florida Coast: Climate change and Anthropogenic Influences.” May 15, 2017 – May 14, 2020. (2017-67003-26482, \$1,330,000). Lead PI: Joseph Smoak, University of South Florida Saint Petersburg
- NSF Polar Programs “Collaborative Research: Subglacial Antarctic Lakes Scientific Access (SALSA): Integrated study of carbon cycling in hydrologically-active subglacial environments.” September 1, 2016 – August 31, 2019. (PLR-1543347 \$395,644). Lead PI: John Priscu, Montana State University
- NSF Paleoperspectives of Climate Change “Collaborative Research: Partitioning early Holocene Laurentide v. Antarctic ice melt from high-resolution reconstruction of sea-level rise and glacial isostatic adjustment modeling.” June 1, 2015 – May 31, 2018. (OCE-1502977 \$151,794). Lead PI: Torbjörn Tornqvist, Tulane University
- NSF Sedimentary Geology and Paleobiology “Collaborative Research: Continuous vs. episodic fluviodeltaic sedimentation: Implications for carbon sequestration and coastal restoration.” June 15, 2012 – May 31, 2016. (EAR-1148005 \$380,913). Lead PI: Zhixiong Shen, Eastern Carolina University
- NSF Office of Polar Programs “Timing and duration of the LGM and post-LGM grounding events in Whales Deep paleo ice stream, eastern Ross Sea middle continental shelf.” October 1, 2012 – May 31, 2016. (\$41,396, current). Lead PI: Phil Bart, Louisiana State University
- NSF Paleoperspectives of Climate Change “Support for the 5th International Clumped Isotope Workshop.” September 1, 2015 – August 31, 2016. (\$10,000). Lead PI: **Brad Rosenheim**, University of South Florida
- Gulf of Mexico Research Initiative RFP-I “Consortium for the Advanced Research of Transport of Hydrocarbon in the Environment.” November 1, 2011 – December 31, 2015 (\$841,693). Consortium Leader: Tamay Özgökmen, University of Miami
- NSF Paleoperspectives in Climate Change "Assessing Wind-driven Circulation Variability in the Subtropical N. Atlantic Using an Array of Archived Radiocarbon Records," June 1, 2009 to May 31, 2013. (OCE-0902980 \$255,073). Lead PI: **Brad Rosenheim**, Tulane University (sole PI)
- NSF Geosciences Instrumentation and Facilities “Development of a Programmed-temperature Pyrolysis/Combustion Reactor System for Radiocarbon Applications,” September 15,

- 2009 – August 31, 2013. (EAR – 0929752 \$215,153). Lead PI: **Brad Rosenheim**, Tulane University (sole PI)
- NSF Geosciences Instrumentation and Facilities “RAPID: Increasing through-put of novel Ramped Pyrolysis Radiocarbon Preparation Technique for Gulf Coast oil spill studies - Instrumentation Development.” Sep. 1, 2010 – Aug. 31, 2013 (EAR – 1058517 \$183,369). Lead PI: **Brad Rosenheim**, Tulane University (sole PI)
- NSF Ecosystems “Collaborative Research: RAPID: The 2011 Atchafalaya River Flood and a possible altered system state for the Atchafalaya River Delta Estuary.” July 1, 2011 – January 1, 2013. (DEB – 1141410 \$37,396). Lead PI: Brian Roberts, LUMCON
- NSF Geobiology and Low-Temperature Geochemistry “Collaborative Research: Geochemical and isotopic time-series of marine and terrestrial degradation of petroleum in the 2010 Gulf of Mexico oil spill.” Aug. 1, 2010 – July 31, 2012. (EAR – 1045845 \$66,094). Lead PI: David Finkelstein, University of Tennessee
- NSF SGER Geomorphology Program "Fate and Transport of Carbon and Sediment during a Mississippi River High Water Event," June 1, 2008 to May 31, 2009. (EAR-0832754, \$29,658). Lead PI: Alexander Kolker, LUMCON
- Louisiana Board of Regents "Determining the Distribution of Ages in Sedimentary Organic Material Carried and Deposited by Mississippi River," June 1, 2009 to May 31, 2012. (\$190,080). Lead PI: **Brad Rosenheim**, Tulane University (sole PI)

Publications (Advised student authors in *italics*, *visiting scholar who produced key published data in Rosenheim Laboratory)

h-index = 32 (Google Scholar, 29 Mar 2024)
 citations = 3131 (Google Scholar, 29 Mar 2024)

Refereed Journal Articles and Book Chapters, *in review or revision*

Mukherjee, U.; Vetter, L.; Milne, G.A.; Tarasov, L.; Steponaitis, E.; Cahill, N.; LeCavelier, B.S.; Rosenheim, B.E.; Törnqvist, T.E. (in review). Revised constraints in the final stages of the last deglaciation from high-resolution sea-level observations. Nature

Sun, D.*; Wu, J.; Rosenheim, B.E.; He, Y.; Cui, X.; Sun, Y. (in revision). Enhanced petrogenic organic carbon export accompanied by decreased sediment loads in river system during degradation of land surface ecology by humans. Geology.

Academic Activities

Courses Taught

OCC6050 (USF): Chemical Oceanography. Co-taught with Kristen Buck, Robert Byrne, and Timothy Conway. This course is part of the core curriculum. I cover radioisotopes in the ocean, stable isotopes, carbon cycling, and other topics as needed. I have flipped my portion of this course.

OCG6051 (USF): Geological Oceanography. Co-taught with Amelia Shevenell and Alastair Graham. This course is part of the core curriculum. I cover sediment transport to the ocean, deep sea sedimentation, regional geologic oceanography (Gulf of Mexico), and biogeochemistry/diagenesis. I have flipped my portion of this course.

OCE6934 (USF): Geochemistry. A survey of geochemistry incorporating units on reactions, stable isotope, radionuclides, and mixing. The course featured lectures on the board, including derivations of common geochemical concepts as well as challenging in-class exercises that were often open-ended. The course featured problem sets, take-home exams, and in-class exams for a broad array of assessment.

OCE6934 (USF): Stable Isotope Geochemistry. This course features condensed intensive lectures with problem sets for 9 weeks, with simultaneous development of an independent research project for graduate students. After a mid-term exam, the class switches to a laboratory research and seminar module. Students present primary literature summaries that are important to their research, they carry out cutting edge research projects in the laboratory, they prepare a manuscript-type report, and they present their findings orally in front of the class.

OCE6934 (USF): Quaternary Marine Geochronology. It relies heavily on laboratory capabilities of the Ramped PyrOx system as students are expected to work collaboratively on geochronological analyses. The students are assessed using a mid-term take-home examination and a collaborative manuscript that is to be publication-ready.

OCE6972 (USF): Directed Research: I teach graduate students individually when they need to learn special topics intensively or for which there is not enough demand to warrant a formal course. Students design syllabi for these courses and I help them prepare learning outcomes, schedules of activities, and assessment in an iterative process. With limited

TAs at CMS, this is valuable for learning curriculum development. We then use that syllabus as a template to conduct advanced literature research (with writing of an introduction to a manuscript as assessment), laboratory experiments (with writing manuscript drafts as an exercise for assessment), and research expeditions (for students that need to spend a large portion of the semester at sea, usually involving a presentation at sea graded by expedition participants).

OCE6971 (USF): Thesis: Masters. Mentoring of M.S. students as primary adviser. This involves weekly progress meetings and filing of progress forms so that students participate actively in formulating goals and evaluating their performance.

OCE7910 (USF): Doctoral Dissertation Research. Mentoring of Ph.D. students as primary adviser. This involves weekly progress meetings and filing of progress forms so that students participate actively in formulating goals and evaluating their performance. Additional professional development is carried out in the form of expecting Ph.D. students to mentor other students in the research group, publication of peer-reviewed journal articles as lead author, and presentations at national and international conferences and workshops.

EENS 6210 (Tulane University): Carbon Cycle Seminar. This course uses David Archer's Carbon Cycle monograph as a basis to explore the literature concerning changes in the Earth's carbon cycle over several time scales in relation to current changes. It is discussion and writing intensive.

EENS 6080 (Tulane University): Climatology and Paleoclimatology of the Common Era. This seminar course is designed to familiarize graduate and advanced undergraduate students with literature concerning very Late Holocene climate and to acclimate students to use of large, publicly available data sets to analyze climate. The course involves literature surveys with a Matlab seminar once per week.

EENS 1300 (Tulane University): Earth: A Living Planet. This course was designed and implemented as an introductory environmental science course. A laboratory section of the course was designed by myself, Dr. Nicole Gasparini, Dr. Gerhard Piringer, and Dr. George Flowers, and implemented by Dr. Flowers in spring of 2010.

EENS/EBIO 6240 (Tulane University): Stable Isotopes in the Environment. This course is designed to familiarize upper level majors and graduate students with the theories and applications of stable isotope measurement in natural levels found in the environment. Half of the class involves lectures and problem sets, while the second half involves performing laboratory analyses for a final class project.

EENS/EBIO 2230 (Tulane University): Introductory Oceanography. This course is aimed at science majors, but accessible to non-majors as well. It involves 3 lectures per week, plus a field trip to LUMCON to perform oceanographic measurements aboard a coastal research vessel.

MSC 101 (University of Miami): Introduction to Oceanography, Non-Science Majors. This course gave me the opportunity to teach lectures on topics as broad as wave physics to coral physiology in a delivery suitable for all backgrounds. I have received excellent reviews from students in these classes and have succeeded in presenting both traditional blackboard lectures and multi-media presentations.

Professional Service

National/International

2022-present	Associate Editor in Geochemistry, <i>Frontiers in Earth Science</i>
2021 – 2024	USF team leader, All-ABOARD (Alliance-Building Offshore to Achieve Resilience and Diversity) program; one of four teams selected nationally
2021 – present	Member, College of Marine Science Diversity, Equity, and Inclusion (DEI) Committee

2021	Member – College of Marine Science URGE Pod
2021-present	Elected, second vice chair of the Geochronology Division of the Geological Society of America – 3-year term cycling through vice chair and chair positions.
2022-2023	Member – AgeS Steering Committee, representative from the Geochronology Division
2021 – present	Member laboratory – AGeS Geochronologic laboratories available for funding competition for students in the Geological Society of America
2018-2019	National-Level Survey and Compiled Letter to the National Science Foundation regarding reporting of harassment in remote field stations and research vessels
2017-2020	Member, Organic Geochemistry Board, Geochemical Society
2014-2016	Advisory and Planning Board, National Ocean Sciences Accelerator Mass Spectrometer, Woods Hole Oceanographic Institution (Chair, 2017).
2016-2019	Member, College of Marine Science Representative – Research Council (distributes overhead funds through several different grant programs within USF system)
2016	Session Convener, American Geophysical Union Ocean Sciences Meeting, Rates of ice retreat and insights into a warming Earth from Antarctic sedimentary and ice records - Dating, chronology, regional correlations, and environmental change
2016	1 st Ramped Pyrolysis Radiocarbon Workshop – Woods Hole Oceanographic Institution. Convener.
2016	National Science Foundation Marine Geology and Geophysics Proposal Review Panel
2015-2016	Host, 5 th International Clumped Isotope Workshop, USF-CMS, Saint Petersburg, Florida
2015-2018	AGU-Paleoclimatology and Paleoceanography Dansgaard Award committee
2015	Session Convener, Goldschmidt Conference, Global Changes in the Fluxes and Reactivity of Riverine Organic Carbon from Channel to Coastal Margin
2015	Session Convener, American Geophysical Union Fall Meeting, Global Changes in the Fluxes and Reactivity of Riverine Organic Carbon from Channel to Coastal Margin
2014-2015	Faculty Search Committee – Biological Oceanography
2014	Session Convener, American Geophysical Union Fall Meeting, Global Changes in the Fluxes and Reactivity of Riverine Organic Carbon from Channel to Coastal Margin
2013	Session Convener, Gulf of Mexico Oil Spill and Ecosystem Conference, Models and observations working together to understand the Deepwater Horizon oil spill
2011	National Science Foundation Marine Geology and Geophysics Proposal Review Panel

2011	Technical Session Chair – South Central Sectional Meeting Geologic Society of America, New Orleans
2008	Session Convener, 11 th International Coral Reef Symposium, Coral Reef Organisms as Recorders of Local and Global Environmental Change
2007	Session Convener, American Geophysical Union Fall Meeting, Understanding Tropical Climate Variability: Combining Observations, Models, and Paleoclimate Records

College/Departmental

Faculty Senate Council on Racial Justice – 2023-present

Phytoplankton Ecologist Search Committee - 2022

Diversity, Equity, and Inclusion Committee of the College of Marine Science – 2021-2023

College of Marine Science Dean Search Committee – 2019-2020

Chair, Geological Oceanography Search Committee – 2018-2019

Chair, USF-CMS Web Committee – 2015-present

USF Research Council – 2016-2019

USF-CMS Conduct and Grievance Committee – 2017-current

Chemical Oceanography Search Committee – USF-CMS, 2016

Biological Oceanography Faculty Search Committee – USF-CMS, 2015

Machine Shop Action Committee – Tulane University, 2012

Chair, Departmental Graduate Studies Committee – Tulane University 2009-2012

School of Science and Engineering Graduate Committee – Tulane University 2009-2012

Invited Seminars

- 2024 What happens to terrestrial organic matter in the ocean? Solving the mystery behind an iconic question – Geotopics Lecture Series, University of Miami Rosenstiel School of Marine and Atmospheric Sciences, February 13, 2024.
- 2022 (Postponed since 2020 due to COVID) Schweppe Lecture, University of Texas Marine Science Institute – November 20-24, 2022.
- 2021 Microbial messages of mantle viscosity – deciphering the signal of Holocene marine incursion, University of Virginia, November 12, 2021
- 2021 Redefining expectations of a good date: Sacrificing precision for accuracy (when necessary), Woods Hole Oceanographic Institution, October 4, 2021
- 2015 Time Matters: Refining regional deglacial chronology from Antarctic marginal marine sediments, University of Kentucky, November 11, 2015
- 2014 Paleoclimatology at the Human Timescale, Eckerd College, St. Petersburg, Florida, May 7, 2014

- 2014 How to ruin a perfectly good (radiocarbon) date – Ramped pyrolysis and age spectra of riverine POC, University of Florida, Gainesville, Florida, April 11, 2014
- 2014 How to ruin a perfectly good (radiocarbon) date – Ramped pyrolysis and age spectra of riverine POC, Northwestern University, Chicago, Illinois, February 21, 2014
- 2013 Paleoclimatology at the Human Timescale, University of South Florida, College of Marine Science, St. Petersburg, Florida, March 17, 2013
- 2010 Burn, baby, Burn! Using refined pyrolysis techniques and radiocarbon to improve our understanding of the carbon cycle, University of Southern Mississippi, Stennis, Mississippi, May 21, 2010
- 2009 Burn, baby, burn: Insights from Pyrolysis/Combustion Radiocarbon Chronology of Sediments, University of Houston, Houston, Texas, January 30, 2009
- 2008 Secrets in Secretions, Louisiana Universities Marine Consortium, Chauvin, Louisiana, December 4, 2008
- 2008 Burn, Baby, Burn! Pyrolysis Radiocarbon Dating applied to Questions of Chronology and Carbon Cycling, Louisiana State University, Wilbur Lecture series (co-hosted by Geology and Oceanography Departments), Baton Rouge, Louisiana, September 18, 2008
- 2007 Climate Change, Carbon, and Chronology, University of Vermont, Department of Geology Seminar Series, Burlington, Vermont, October 8, 2007
- 2007 The Burning Question of Antarctic Sediment Chronology, Brown University, Providence, Rhode Island, February 26, 2007
- 2007 Revealing the spectrum of ages in bulk-dated organic material from Antarctic Peninsula sediment cores using programmed temperature pyrolysis, University of Miami (RSMAS), Key Biscayne, Florida, Division of Marine Geology and Geophysics Geotopics Series, February 13, 2007

Laboratory Experience and Supervision

Isotope Ratio Mass Spectrometry. I have experience using state of the art IRMS technology. I have used systems from VG Isogas, Thermo-Finnigan (Delta Plus), Finnigan MAT (251), Europa Geo (20/20) to analyze carbonates and waters. I have developed standardized laboratory computation programs for correction of isotope data and I have performed standardization of the Thermo-Finnigan Delta Plus with Kiel III carbonate device to overcome heterogeneities associated with small sample size capabilities. I have successfully adapted an Isoprime mass spectrometer to make clumped isotope measurements at the same precision as more expensive instrumentation, broadening the base of scientists who will participate in developing this method.

Accelerator Mass Spectrometry. I was part of a team which built a novel continuous flow accelerator mass spectrometer at the National Ocean Science Accelerator Mass Spectrometry facility at the Woods Hole Oceanographic Institution. I wired components for the system, designed a magnet cooling system for the high energy magnet, and wrote the control software for the instrument using LabVIEW environment.

Radiocarbon Determination and Organics. My laboratory group currently runs two Programmed Temperature Combustion systems. We use this system for radiocarbon dating applied to questions of chronology and carbon cycling, as well as oil pollution in sediments.

Laser Ablation/Decomposition. I have used laser ablation as a fine scale subsampling tool for paleoceanographic studies. I have made several advances toward developing a technique to use CO₂ generated from laser decomposition of carbonate mineral surfaces for direct AMS determination of ¹⁴C.

Minor and Trace Element Spectrometry and Spectroscopy. I experienced in operation of an Inductively Coupled Plasma spectroscope. I have used ICP-AE and OE spectrometers in both industry and academia. Most recently, I was responsible for standardizing a newly acquired Varian Vista Pro ICP-OES axial spectrometer to analyze large carbonate samples for trace elements and small carbonate samples for minor elements. I have performed standardization with seawater samples of various strengths. I have experience with ICP-MS, especially interfaced with a laser micro-sampling device.

Microscopy. I operated both epifluorescence and scanning electron microscopes for minor parts of my Ph.D. dissertation. I am familiar with the principles of these technologies and able to use them autonomously.

Fieldwork Experience

May – July 2023: Chief Scientist. Led expedition to Brazil, French Guiana, and Suriname. Traveled overland with frozen samples and sampling equipment from Brazil to French Guiana due to interdiction of U.S. inspected vessels entering Brazil coastal waters within 12 nautical miles, met U.S. flagged R/V F.G. Walton Smith and multinational scientific party in Cayenne, French Guiana. Led ocean-going portion of the expedition aboard the R/V F.G. Walton Smith, sampling in Brazil, France, and Surinam coastal waters.

December 2018 – January 2019: Deployed to deep field camp at Mercer Subglacial Lake in Antarctic as an executive committee member and sediment team member for the Subglacial Antarctic Lakes Scientific Access (SALSA) project. Designed and deployed a sediment corer that was able to take the longest subglacial sediment core at the time (1.79 m).

May 2017 – present: Ongoing small boat operations and sediment coring in the Ten Thousand Islands mangrove ecosystem of Southwest Florida.

- July 7 – July 10, 2014: co-Chief Scientist. PE15-01 Water Column Sampling Cruise, R.V. Pelican, Consortium for the Advanced Research of Transport of Hydrocarbon in the Environment.
- June 24 – June 29, 2013: Chief Scientist. PE13-33 Benthic Observations Cruise, R.V. Pelican. Consortium for the Advanced Research of Transport of Hydrocarbon in the Environment.
- October 7- October 31, 2012: Shipboard Scientist. LMG12-11 LARISSA Cruise, Antarctic Peninsula. Gravity, piston, and kasten cores of paleo ice stream drape sediment.
- June 30 – July 3, 2012: Chief Scientist. PE12-33 Benthic Observations Cruise, R.V. Pelican. Consortium for the Advanced Research of Transport of Hydrocarbon in the Environment.
- April 2008 - present: Survey boat surveying and sampling of Mississippi River (lower reaches) and Atchafalaya River. The research was originally carried out under an NSF SGER grant for sampling of suspended sediment and new sedimentation. The goal of continued research is to characterize this sediment in terms of the spectra of radiocarbon ages present both before and after deposition and to compare between to normal and low flow stages.
- August, 2008 – July 2009: Sedimentation and reef survey, Lana'i, Hawaii. These research involves pilot funds from Tulane University (post Hurricane Katrina research enhancement funds) to commence a research collaboration in Hawai'i involving characterization of erosional processes in terms of land use change and climate change. Sedimentation and carbon transport from the ridges of the volcanoes to the reefs is the goal of measurement and quantification.
- June, 2007: Submersible research cruise, Key West to Fort Lauderdale, Florida, in collaboration with the University of Miami and Harbor Branch Oceanographic Institution. Several submersible dives were made for collection of marine species living at depths less than 990m and of interest in paleoceanographic studies and pharmaceutical research.
- May-June, 2003: Exploration of French Antilles for scuba-accessible sclerosponge specimens. Three week scuba exploration of all areas of the coast with either submarine grottoes or steep walls, both conducive to cryptic sclerosponge habitat.
- October-November, 2002: Caribbean Atlantic Salinity Experiment (CASE-02) Cruise aboard the R/V Suncoaster. I participated in both legs of a month-long coral core collection expedition spanning the Bahamas to the St. Vincent Grenadines. Responsible for drilling corals by scuba using a hydraulic drill tethered to a small dinghy launched from the main vessel. Corals located using physical geography and existing literature to explore each island by snorkel.

- August, 2002: Sequence Stratigraphy of the Madison formation. Field Assistant for the Comparative Sedimentology Laboratory of the U. of Miami. Measured stratigraphic section of the Madison formation outcropping in Montana.
- May, 2002: Stage II of NSF-funded Sclerosponge Calibration Project, Discovery Bay, Jamaica. Sclerosponges were sampled after an incubation period of nearly 3 years. Other sclerosponges were re-stained with Calcein and thermistors were swapped and re-calibrated. Corals were also sampled to compare with proximal sclerosponge records.
- September, 2001: Geochemical Classification of Bahamas Bank Sediment cruise, R/V Bellows. This cruise gridded the NW Great Bahamas Bank, sampling sediment and water every 10km. Analysis for salinity, grain type, and skeletal makeup of waters and sediment performed on-board.
- May, 2001: Carbonate petrography class trip to Andros Island in the Bahamas. Studied Aeolian and shallow water carbonate deposits from the Pleistocene and Holocene as a class project. I took part in explorations of the supratidal mud flats of western Andros Island and sampled dolomite crusts forming in these unique environments.
- August, 2000: Exploration of the Commonwealth of Dominica for mature coral colonies. Explored the leeward coast of Dominica for large heads of *Siderastraea sideraea* suitable for climate records and potential sclerosponge environments by scuba. Several *S. Sideraea* colonies were drilled pneumatically and brought back to Miami. No sclerosponges were found. Also assisted in surveying reef to quantify and monitor corals with known diseases.
- August, 1999: Initiation of NSF funded Sclerosponge Calibration Project, Discovery Bay, Jamaica. Installed and calibrated temperature thermistors in submarine reef enclosure and stained sclerosponge surfaces using Calcein, a fluorochrome. Operations performed by scuba.
- June-July 2000: Relocation of sediment traps and levels, Roatan, Honduras. I took part in the final part of an abiotic reef survey, relocating sediment measuring devices and recording reef transects for changes since the project was started.
- July, 1999: Post-Hurricane Mitch abiotic reef assessment, Roatan, Honduras. This trip was planned to assess catastrophic changes to sections of reef due to the passing of Hurricane Mitch the previous year. Sedimentation measuring devices and coral transects were located by snorkel and scuba.
- July, 1998: Sampling of *Montastraea annularis* for my undergraduate honors thesis, Roatan, Honduras. Land use patterns of the island were assessed and corals were sampled from long-disturbed area, recently-disturbed area, and pristine offshore control site.

Scientific Workshops Attended and Hosted

- 2022 Safety in Ocean Sciences Workshop – Consortium of Ocean Leadership
- 2021 Korean Polar Research Institute Symposium, *invited speaker*
- 2021 Workshop for Safety in Field Sciences – Consortium of Ocean Leadership, online.
- 2016 1st Ramped Pyrolysis Radiocarbon Workshop – Woods Hole Oceanographic Institution. Convener.
- 2015 Host, 5th International Clumped Isotope Workshop, St. Petersburg, Florida, U.S.A.
- 2014 SOM6 – 6th International Workshop on Soil Organic Matter Stabilization and Destabilization, Kiawah Island, South Carolina
- 2014 4th International Clumped Isotope Workshop, ETH Zurich, Zurich, Switzerland
- 2014 Korean Polar Research Institute Symposium, *invited speaker*.
- 2013 MOSSFA Working Group Meeting, Florida State University, Tallahassee, Florida
- 2013 3rd International Clumped Isotope Workshop, Harvard University, Boston, Massachusetts
- 2011 International Workshop on Small Scale Radiocarbon Analysis, ETH, Zurich, Switzerland
- 2010 1st International Clumped Isotope Workshop, University of Washington, Seattle, Washington
- 2006 IODP Caribbean Gateway Workshop, Austin, Texas
- 2006 CLIVAR Salinity Workshop, Woods Hole Oceanographic Institution, Woods Hole, Massachusetts

Outreach

- 2024 Quoted in New York Times article on the demise of the Anthropocene Epoch as an official geological division of time, using my statement as chair of the Geochronology Division of the Geological Society of America
https://www.nytimes.com/2024/03/20/climate/anthropocene-vote-upheld.html?ugrp=u&unlocked_article_code=1.fU0.m6X4.eGP8oz0f6bv0&smid=url-share

- 2024 Interviewed for New York Times article on sclerosponge temperature records as a scientist uninvolved with highlight study (McCulloch et al., 2024, Nature Climate Change). https://www.nytimes.com/2024/02/05/climate/global-warming-sponges.html?ugrp=u&unlocked_article_code=1.gU0.bVw9.KPSOWRD9SaSk&smid=url-share
- 2023 Release of “The Lake at the Bottom of the World”, a document about the Subglacial Antarctic Lakes Scientific Access (SALSA) project, streaming on major video platforms like Amazon Prime, YouTube
- 2023 Film screening, “The Lake at the Bottom of the World” at the St. Petersburg Science Festival
- 2021 Team leader, [All-ABOARD](#) program (“A Bull’s Eye for JEDI). Leading intergenerational team of USF STEM personnel to establish roadmaps for success for minoritized students and for administrators supporting students, ultimately aiming to create an REU site proposal here at CMS.
- 2014–2019. Paleoceanography booth at the Saint Petersburg Science Festival, serving 25,000 students from around the region. I develop content and participate in the booth.
- 2011 National Public Radio Interview “In Cleaning Oiled Marshlands, A Sea of Unknowns” (<http://www.npr.org/2011/04/20/135571426/in-cleaning-oiled-marshlands-a-sea-of-unknowns>)
- 2010 National Geographic News “Exxon Valdez Lessons Applied in Gulf Coast Cleanup.” (<http://news.nationalgeographic.com/news/2010/12/101203-nsf-gulf-oil-weathered-vin-video/>)
- 2010 Public Broadcasting System Televised Panel “Science of the Spill.” (https://www.youtube.com/watch?v=Q_G0qu0eUKw)
- 2008 - 2011 NOLA S.M.I.L.E. (New Orleans, Louisiana, Science and Mathematics Inquiry Learning and Experience). Workshop for 3rd and 4th grade teachers in Southeast Louisiana focusing on Earth Science.
